Columbus, OH | (614) 562-2558

michael.alan.eden@gmail.com | [LinkedIn](#) | [GitHub](#)

Coding bootcamp graduate with a passion for learning and working with others. Natural communicator eager to step into a junior Software Developer role and contribute to solving problems with a team.

TECHNICAL SKILLS

Spring Boot, Java, PostgreSQL, HTML, CSS, JavaScript, Vue.js, Responsive Design, IntelliJ, Git, Unit Testing (JUnit), E/R Diagrams, Integration Testing, Unix

TECHNICAL EXPERIENCE

Climbit - A full stack, mobile-first application built as a team of four (Tech Elevator Final Capstone Project). Built with Vue.js, Spring Boot, Java, and PostgreSQL, and incorporating the Google Maps and Cloudinary APIs in addition to the Vuetify component framework, the application allows users to explore climbing destinations around the country and connect with other climbers.

Climber/Climbing Trip Application - Personal project developed in Java utilizing the fundamentals of Object-Oriented Programming, Spring Boot, and PostgreSQL. Allows a group of rock climbers to input and manage their availability and interests through a command line interface to go on climbing trips together.

Mock Venmo Application - Another Tech Elevator capstone project, also developed in Java as a pair programming object. Created a REST API that connects to an SQL database to allow users to send and receive transactions through a command line interface.

EDUCATION

Tech Elevator, National Live Remote

October 2022 – February 2023

Graduated the 14-week full-stack coding bootcamp to develop dynamic web-based software systems using Java, involving 800+ hours of development education and application.

Hocking College, Nelsonville, OH
