*Coding bootcamp graduate, with a passion for learning and working with others. Natural communicator, eager to step into a junior developer role and start solving problems with a team.*

## TECHNICAL SKILLS

---

Spring Boot, Java, PostgreSQL, HTML, CSS, JavaScript, Vue.js, Responsive Design, IntelliJ, Git, Unit Testing (JUnit), E/R diagrams, Integration Testing, Unix

## TECHNICAL EXPERIENCE

---

**Climbit** - Tech Elevator final capstone, a fullstack, mobile first application built as a team of four. Built with Vue.js, Spring boot, Java, and PostgreSQL, and incorporating the Google Maps and Cloudinary APIs in addition to the Vuetify component framework, the application allows users to explore climbing destinations around the country and connect with other climbers.

**Climber/Climbing Trip Application** - Personal project developed in Java utilizing the fundamentals of object oriented programming, Spring, and PostgreSQL, allows a group of rock climbers to input and manage their availability and interests through a command line interface to go on climbing trips together

**Mock Venmo Application**- Another Tech Elevator capstone project, also developed in Java as a pair programming object, created a REST API that connects to an SQL database to allow user to send and receive transactions through a command line interface

## EDUCATION

---

**Tech Elevator, National Live Remote** **October 2022 – February 2023**

Graduated the 14-week full-stack coding bootcamp to develop dynamic web-based software systems using Java, involving 800+ hours of development education and application.

**Hocking College, Nelsonville, OH** **May 2018**

Associates- Natural and Historical Interpretation
